Intelligent Mobile Design

The slim and lightweight SZ Notebook combines intelligent mobile design, cutting-edge performance and contemporary style. With a superb 13.3" widescreen display⁵, extensive standard battery life¹, Intel® Core™ Duo processor, a 5400rpm SATA hard drive and advanced DDR2 memory, you can work faster, play longer and get more with the VAIO® SZ Series Notebooks. Control efficiency and output with innovative hybrid graphics chips, while integrated security features keep your data safe. And an optional built-in camera and microphone make real-time communication¹³ convenient and easy. Designed with total cost of ownership in mind the VAIO® SZ Series is the ideal choice for enterprise-wide deployment to highly mobile users.

AdaptivePlus™ Technology

AdaptivePlus™ technology is a thoroughly customizable approach to the technology and the hardware that power your team. It's Sony's unique and modular approach to information technology. In today's competitive business landscape, AdaptivePlus™ technology is that extra edge, complementing the talents of your team with the support of leading-edge technology and the flexibility to use it in whatever way serves you best - with intelligent integration that make smart technology resource management a visible factor on your bottom line. Flexibility. Mobility. Security. Communication. The VAIO® Professional line places them at a premium, just like you do.

Intel® Core™ Duo Processors Support

The Sony VAIO® SZ Series Notebook is powered by an Intel® Core™ Duo processor that enables outstanding performance for parallel executions of multiple applications. Do more, faster and use less energy for that exceptional multimedia experience.

Exceptionally Thin LCD

White LED Backlight technology²⁴ and expertly-designed display circuitry give the VAIO® SZ Notebook widescreen display with XBRITE™ LCD technology a razor-thin profile, while Sony's original XBRITE™ LCD technology delivers higher brightness levels than standard displays.

G-Sensor™ Shock Protection

When the VAIO® SZ Series Notebook's built-in 3D acceleration sensor detects a risky movement (like being dropped or hit), the HDD-head will lock up to secure its position and to protect the disc from scratching. An intelligent algorithm (unique to VAIO® Notebooks) judges the movement, activating the disk drive protection only when your hardware and data are at risk.

Long Battery Life¹

Capitalizing on a high-capacity battery, Intel® Core™ Duo processor and innovative Hybrid Graphics System, the VAIO® SZ Series Notebook can blaze through your workload and your entertainment demands for hours. It's an ideal mobile counterpart when on the go. Work faster. Play longer. Get more from every moment with the VAIO® SZ Notebook.

Carbon Fiber Body²⁴

The VAIO® SZ Series Notebook is enclosed in a multi-layer, carbon-fiber casing, the same cutting-edge material used to keep jet airplanes light and quick and sports cars fleet, yet durable. This heavy-duty form factor is much lighter and stronger than the magnesium alloy used for most notebooks.

Biometric Fingerprint Sensor

The integrated biometric fingerprint sensor in the VAIO® SZ Series Notebook ensures controlled access to your computer — the most convenient means of protecting your critical data.

Hybrid Graphics System

Exclusive to VAIO® notebooks, the revolutionary Hybrid Graphics System lets you set your graphics performance. A simple hardware switch enables you to toggle between an internal graphics chip for optimal power consumption and an external graphics chip for even more robust performance.

Optional Built-in Camera and Microphone

Prepare for convenient video conferencing over IP. Choose the optional built-in camera and optional Bluetooth® headset and your VAIO® SZ Series Notebook is hardware-capable for real-time video conferencing¹³.

Cisco™ V3 Compliant¹²

The Sony VAIO® SZ Series Notebook has been tested in accordance with test criteria set by Cisco and is compatible with Cisco's Aironet 1200AG Series Access Point platform and Cisco's Access Control Server V3.3.

SmartWi™ Technology

Sony's original SmartWi™ technology seamlessly integrates wireless Wide Area Network (WAN)², 802.11 a/b/g wireless LAN³, and Bluetooth®⁴ technologies. Now you can quickly and easily toggle among your wireless connectivity options — wireless LAN³ for home, office, and hotspots; Bluetooth®⁴ for peripherals; and wireless WAN² for access to the Cingular Wireless EDGE network when you're traveling outside the reach of LAN³ access networks and hotspots.
